

CALL MANAGEMENT SERVICES

Our sophisticated CALL MANAGEMENT SERVICES offer customers a host of popular and user-friendly features

call waiting

Alerts you that an incoming call is waiting while you are on the phone. You can put your current call on hold and pick another call.

call forwarding

Forwards your incoming calls to another local telephone number, including your mobile or pager.

conference calling

Speaks with friends at two different locations on one phone conversation.

Block-the blocker

With calling number display, Block-the blocker can reject anonymous callers who choose not to transmit their phone numbers. Your phone will not ring and the calls are diverted to an announcement telling the callers that their calls will not get through.

calling number display

Let you have one primary phone number plus one "Duplex Ringing for Fax" number on one i-CABLE registered line. Each of these numbers has a distinct ringing pattern on the same line for easy recognition.

calling number display

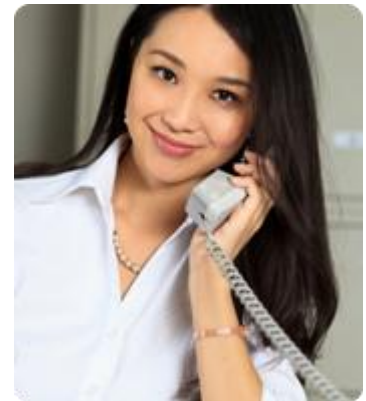

When your phone rings as it displays the phone number of the caller. If you miss a call, your display phone or Caller Display Unit will automatically record the date, time and calling number of any calls made to your telephone line.

duplex ringing for fax

Let you have one primary phone number plus one "Duplex Ringing for Fax" number on one i-CABLE registered line. Each of these numbers has a distinct ringing pattern on the same line for easy recognition.

speed call

It allows you to store up to 8 numbers on a Speed Call list. Stored numbers can be dialed by pressing the * key and a one-digit code.

remote call forwarding

It keeps you connected all the time. Wherever you are, you can remotely divert all incoming calls to any local number including your mobile or pager.

calling number blocking

Enables you to stop your telephone number from being displayed to the receiving party except for calls to 999 emergency hotline. You can choose one of the two blocking functions free of charge.

- Per Call Blocking

This function is automatically provided to your i-CABLE telephone line. When making a particular call, simply press "133" before you dial in the telephone number as usual, it allows you to stop your number from displaying to the receiving party. However, you need to activate this function each time if you do not want to display your telephone number.

- Per Line Blocking

With this function, your telephone number will not be shown for all calls made from your line. To deactivate "per line blocking" function for a particular call when you want to display your telephone number to the receiving party, simply press "1357" followed by the telephone number as usual.

call blocking

Restricts the types of outgoing chargeable calls such as IDD and 900 information services which can be made from your registered line.

Appointment Reminder

Reminds you the important appointments by calling you at the specified time.

Do-Not-Disturb

Allows you to temporarily block incoming calls. When this feature is activated, the calling party hears a Do-Not-Disturb announcement message. Only callers who know your password are able to put through.

WEBTONE

WebTone gives you free access to Internet on telephone line!

MobileRing

You can make use of MobileRing different ringing tone to differentiate calls diverted from your mobile phone to i-CABLE Homeline, bringing you much convenience and savings in mobile charges.
